FHM Order Form

This form is required to order a Flexible Hardware Module (FHM). By submitting this request, you acknowledge that the FHM that you receive may not function entirely according to published specifications. That is, there may be errata of which we are not currently aware. While we have made every effort to thoroughly test the circuitry and software, it is always possible that we have missed something.

Ordering an FHM **requires** that you send us a donor module to use to mount the FHM. We have to open this module housing to replace the circuitry inside with the programmed FMH board. Sometimes a module housing resists opening (understandable, given that it was never designed to be opened) and is destroyed in the process. If this happens we can still use the module connector. We have a **very** limited number of original housings available, or we can use a 3-D printed housing. The 3-D printed housings do not fit in the calculator very well, but without access to the design files we are at the mercy of the supplier.

The original extending handle on the donor module will be modified so that it is fixed, like the one on a Port cover. This is necessary because of the space required inside the module housing by the FHM.

If you agree to the above caveats, please fill out the remainder of the form (both pages) and return it to us via email. Once we receive this form **and your donor module** we'll send you an invoice via PayPal for the funds.

Shipping address (if your country uses a different ordering just fill it in as it should go on the shipping label):

Name: _____
Address 1: _____
Address 2: _____
City: _____
State: _____
Postal Code: _____
Country: _____

Item	Pricing: (\$US)	Qty	Notes
FHM circuit board (programmed)	\$85	___	includes assembly with connector you supply
3-D printed Module housing	\$20	___	only if we can't use the housing you supply!
U.S. Shipping	\$7	___	First Class
International Shipping	\$16	___	First Class International
International Shipping	\$36	___	Priority Mail International

FHM Programming

Module Name	ROM contents	QTY	
Time Module	TIME-1C.ROM	___	Page __5_
HP-41C Service	SERVICE-C.ROM	___	Page __4_
HP-41CV/CX Service	SERVICE-CX.ROM	___	Page __4_
HP Printer Service	PRTSRVC.ROM	___	Page __4_

Note that it is possible to add either or both of the 41C memory functions below to any of the above modules.

Quad Memory _____

Double X-Memory _____
