HP-41 MAXX Order Form

This form is required to order an HP-41 MAXX module. By submitting this form, you acknowledge that the module you receive may not function entirely according to published specifications. That is, there may be errors that we are not currently aware of. While we have made every effort to thoroughly test the circuitry and software, it is always possible that we have missed something.

An HP-41 MAXX module requires a donor module to hold the new circuit board. We have to open this module housing to replace the circuit board inside with the new circuit board.

The original handle on the donor module will be modified so that it is fixed, like the one on a Port cover. This is necessary because of the space required inside the module housing by the new circuit board.

If you agree to the above caveats, please fill out the remainder of the form and return it to us via email and with your donor module. Once we receive this form **and your donor module** we'll send you an invoice via PayPal for the funds. Shipping will be calculated based on the destination. We use the postal service unless you request otherwise. If your country uses a different addressing arrangement just fill in the information as it should go on the shipping label. At this time we generally use a First Class small padded envelope to ship an HP-41 MAXX module, but we can also use a Priority Mail Small Flat Rate box if you want tracking info.

Name: _____
Address 1: _____
Address 2: _____
City: _____
State: _____
Postal Code: _____
Country: _____

___ **HP-41 MAXX** **\$135** You **must** supply a donor module
